Projects

Back End for E-Commerce (MySQL)
- Repo: https://github.com/srlevit94/E-Commerce-Back-End-Product-DB
- Demo: https://watch.screencastify.com/v/1y0bHlY0XJkTPgFeNXq3
- Uses MySQL to keep a database of Products, the Category they fall into, and associated Tags

Weather App (HTML, CSS, JavaScript, APIs)
- Repo: https://github.com/srlevit94/weather-dashboard-m06
- Deployed App: https://srlevit94.github.io/weather-dashboard-m06/
- Site allows user to enter a city name, then displays that city's weather forecast pulled from the Open Weather API

Team Profile Generator (CLI, JavaScript, CSS)
- Repo: https://github.com/srlevit94/team-profile-generator-m10
- Demo: https://watch.screencastify.com/v/DXMf8fueWbm0qa6CpF6g
- Uses CLI prompts for user to enter data about their team, then generates an HTML page with each member's information within styled cards

Work Experience

University of California, Los Angeles   May 2022 - Present
Exchange Visitor (J-1) Counselor, Full-Time   Los Angeles, CA
- Provides J-1 visa-related advising and services for over 3,000 International students and scholars
